Wally

Ready to point you in
the right direction

In the bustling urban tapestry, andre' proudly presents the innovative Wally wayfinding signage. These signs are your steadfast allies, ready to guide you seamlessly through the urban maze. Designed to effortlessly integrate into any streetscape, the Wally pennants offer a sleek and unobtrusive solution to urban navigation.

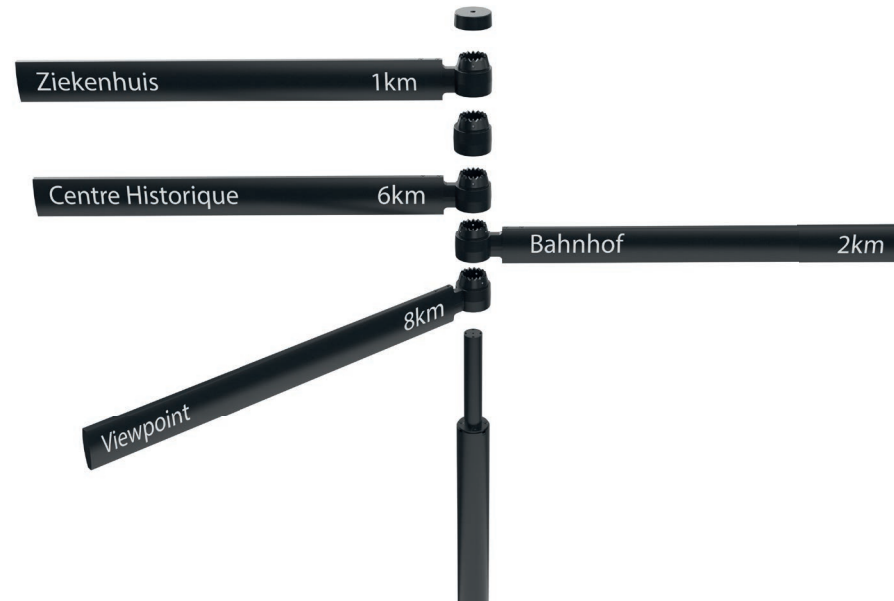

Materials

Wally is made entirely from sustainable and recycled materials.

The pennants are made from recycled aluminium which is a composite of diecast aluminium and extruded aluminium.

It has a steel pole with galvanization.

The whole ensemble is finished with powder coating in a standard RAL colour of your choice.

Options

You can personalize Wally in many different ways such as

- arrows in different colours
- letters in different colours
- layout
- symbols
- walking distance
- walking time

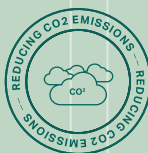

The top cap can be in a different colour (for example, to indicate that zone of a city).
The length of the pennant is standard 800mm, but can also be shorter.

Placement

As standard, the pole is permanently concreted (placed), on-site, but can also be provided with a base plate for ground-level mounting, for mounting below ground level, or can be placed in a removable base.

andre' doesn't just produce,
we create a vibrant
ECONscious urban lifestyle
– one street at a time.
